ABOUT THE UNIVERSITY

Srinath University is a premier university in the state of Jharkhand with highest academic standards, diverse educational programmes, distinguished faculties, ultra-modern infrastructure and varied co-curricular activities. We aim to become a role model and trend setter for the various universities ensured with our strong commitment to excellence in teaching, research and social outreach.

About the Department

Department of Commerce and Management under Srinath University were established in 2021 as a private educational institute to provide higher education to build a career in the field of Commerce and Management. It offers courses such as Ph.D. MBA, BBA, M.COM and B.COM (Hons). Department offers blends of education and extra-curricular activities to enhance the interaction and bonding among students. Also these activities lead the students to improve their leadership and interpersonal skills along with learning and development. There is a separate placement department which is responsible for enhancing the student's knowledge, aptitude, and skill tests. This cell also invites, and targets the organizations for facilitating placements and internship opportunities to the students.

OBJECTIVE OF THE WORKSHOP

The workshop shall provide basics of qualitative and quantitative data management and analysis, a primary research skill. This workshop will help the participants to learn how to enter the data, convert the format of the data (data transformation) and how to get descriptive and inferential statistics using SPSS. The workshop shall also provide techniques to analyses various data collected from different sources.

RATIONALE OF SPSS WORKSHOP

SPSS (Statistical Package for Social Sciences) is the set of software programs that are combined together in a single, user-friendly package. It stores and organizes the provided data, compiles data set and produces outputs based on that. It can handle a large set of variable data formats. Working on data is a complex and time-consuming process and that makes learning to use SPSS.

SPSS is very essential for anyone planning or doing research in the field of Commerce and Management, Education, Humanities, Science & Technology and many more.

WORKSHOP OUTCOME:

This workshop will equip the participants to handle and manage the data and use the techniques within this package. They will be able to understand, interpret, analyze and produce characteristic patterns between different data variables. They will also learn to obtain output in tabular and graphical representations that can be used in a research report.
