General Job Description

- Operations & Production: Assist senior engineers in daily production schedules, machine operations, and process monitoring to meet output targets.
- Maintenance & Troubleshooting: Support preventive, predictive, and breakdown maintenance activities for plant equipment, machinery, and electrical/mechanical systems.
- Quality & Inspection: Perform quality control checks, raw material testing, and product inspections using standard gauges, measuring tools, and testing equipment.
- Documentation & Reporting: Maintain daily logbooks, shift handover reports, maintenance logs, and production records.
- Safety & Compliance: Ensure 100% adherence to standard operating procedures (SOPs), 5S methodologies, and shop-floor safety regulations.
- Continuous Improvement: Participate in root cause analysis (RCA), Kaizen initiatives, and process optimization projects to minimize downtime and waste.

Required Skills

- Engineering Drawings: Reading blueprints, schematics, and CAD layouts.
- Tools & Equipment: Hand-tool operation and precision measuring instruments (calipers, multimeters, gauges).
- Operations & Maintenance: Basic equipment troubleshooting, assembly, and process monitoring.
- Quality & Safety: 5S methodology, standard operating procedures (SOPs), and workplace safety compliance.
