JOB DESCRIPTION

AccessHub

Organization:	**AssessHub**
Job Title:	**AI-First Full Stack Developer**
CTC:	**5 LPA**
Location:	**MUMBAI**
Departments Eligibility:	**B.TECH**
Course Eligibility	**CSE**
Student Gender Preference:	**ALL**

General Job Description

- Build and deploy production-ready features across both frontend and backend.
- Develop scalable APIs using Node.js and Python.
- Build responsive and high-performance applications using React / Next.js.
- Design, optimize, and maintain database queries using PostgreSQL, MongoDB, and Redis.
- Integrate third-party APIs and AI-driven workflows.
- Develop and maintain REST/Web hook integrations with proper authentication, error handling, retries, and performance optimization.
- Debug production issues and continuously improve application performance.
- Collaborate with product and design teams to convert ideas into working features quickly.
- Use AI development tools such as Copilot, Claude, Codex, Cursor, or equivalent to accelerate development.
- Take ownership of features from development through deployment

Preferred Skills

- Strong practical knowledge of Node.js, Python, and React.
- Strong understanding of REST APIs, Webhooks, OAuth/JWT authentication, and external API integrations.
- Good knowledge of asynchronous programming and database design.
- Experience building and deploying real-world products used by customers/users.
- Ability to independently debug and resolve production issues.
- Familiarity with Git workflows, deployments, and cloud environments.
- Strong problem-solving, ownership, and learning mindset.
